EXPERIENCE

AI Health Systems Intern | University of Utah Health | Sep 2026 - Present

- Built automated email notifications for AI request website form configured with global and individual request controls.
- Recreated a GenAI productivity dashboard, visualizing platform usage and productivity metrics across Copilot, Gemini, Claude, and ChatGPT.

Software Developer | University of Utah Robotics Team | Sept 2024 - May 2025

- Improved robot control UI and simulation using Godot with intuitive visuals and pathing indicators.
- Developed a camera-based map visualizer for robot data.

Broadcasting / AV Technician Crew | The King's Academy | Jan 2022 - May 2023

- Served as news anchor and game-show host
- Created 3D "Starting Soon" screen in Blender
- Set up microphones, amps, and instruments
- Handled sound board to control sound throughout service
- Set up equipment and managed live stream broadcast

PROJECTS

[Prown Brawl Game](#) | Godot Game Engine | Jan 2026

- Designed and coded the menu interfaces and game UI
- Implemented a local multiplayer system with seamless support for keyboard and gamepad controls.
- Designed a flexible game framework to simplify adding new game modes and mechanics.

[Brave The Storm Game](#) | Godot Game Engine | Feb 2025

- Developed player controls with core fishing mechanics.
- Built a flexible dialogue system that changes character interactions based on game conditions.
- Built a fish class system supporting unique fish types with customizable properties such as color, size, price, and habitat.

[Last Round](#) | Unity Engine | June 2026

- Model-View-Controller (MVC) Code Architecture
- Game State Management
- Bullet Organization System
- Bullet Type Class Organization
- Entity (Enemy/Player) Class Organization
- Status Effect Management (Stun, Poison, Buff)

[Goblins Machinima Project](#) | Unreal Engine | April 2026

- Designed vfx elements (magic beam, explosion, ice) using Unreal Engine's Niagara particle system and material editor.
- Modeled 3d prop models using Blender.
- Integrated hard surface models and vfx into animation using Unreal Engine's sequencer.

[Sticky Situation](#) | Unity Engine CMU Nat'l High School Game Academy | Aug 2021

- Developed 2D active ragdoll physics for generating player movement.
- Implemented player abilities including shooting, grappling, and shielding.
- Designed and programmed the main menu and level selection interface.

TECHNICAL

LANGUAGES

C#, C++, Python, Java, Typescript, SQL

WEB DEVELOPMENT

React, REST APIs, HTML/CSS

AI

Claude Code, OpenAI Codex, LLM APIs

CLOUD & APIs

API Integration, DynamoDB, Github

GAME DEVELOPMENT

Unity, Unreal Engine, Godot, Blender, Photoshop

COURSEWORK

Object Oriented Programming

Data Structures and Algorithms

Computer System & Organization

Digital Content Creation

Asset Pipeline

Software Practices

Data Wrangling

Machinima

Web Development

Game Development

Upcoming Coursework

Mobile App Development

Database Systems

Human Centered Data Mgmt

EDUCATION

University of Utah | 3.83 GPA

B.S. in Software Development w/ Game Engineer emphasis | Expected Dec 2028

PERSONAL

Robotics

Video Games, Anime/Manga
Volleyball, Taekwondo
